Upgrade and Modernization Project Update

The WWTF Upgrade and Modernization Project is progressing. The Mechanical and Electrical work for the Secondary Clarifiers, Blower Building and Bioreactor is underway. 22 of 36 Bioreactor walls are complete. Our goal is to commission the east half of the Bioreactor in September to ensure the federal effluent regulations can be met by the end of December 2020. The Project can be seen using our web camera at www.transaqua.ca.

2020 Compost Program

TransAqua's Compost Program continues to be successful with the help of local citizens, municipalities and charities. We are pleased to provide compost as part of our commitment to the community towards environmental sustainability.

TransAqua's Compost toilets Update

TransAqua is working diligently with the City of Moncton, City of Dieppe and Town of Riverview to coordinate the opening of strategic outdoor washroom facilities along the Riverfront Trail. TransAqua is working to secure a supply of disinfectant and a secure storage method prior to opening our compost toilets. TransAqua is expecting to open the compost toilets near the Skate Park in Moncton and near the Gunningsville Bridge playground in Riverview as soon as possible. Please sign up to receive new information and updates at www.transaqua.ca

let us know how we are doing by sending your questions to us at information@transaqua.ca.

Win your 2020 Water and Sewer Bill up to \$1,000

TransAqua unveiled its new Public Information Booth and our new contest at the February 19, 2020 Moncton Wildcats game. A lot of spectators dropped by the booth and answered three skill testing questions entering a ballot to win their 2020 Water and Sewer Bill up to \$1,000. The Draw will take place the third week of December right before the holidays! Ratepayers can enter online at www.transaqua.ca or at our Administration Building located at 355 Hillsborough Road in Riverview. We hope to see you at popular public events when possible once the new normal has been established. The 3 hot topics for 2020 are "Grease – keep it out of our sewers", "Household wipes, why you should not flush "flushable wipes" and "Garburators, there's a better way". Grease, flushable wipes and food in the sewer system can negatively impact the new biological process that will be commissioned later in 2020. Please do your part to help TransAqua!

Mise à jour sur le projet de modernisation

The WWTF Upgrade and Modernization Project is progressing. The Mechanical and Electrical work for the Secondary Clarifiers, Blower Building and Bioreactor is underway. 22 of 36 Bioreactor walls are complete. Our goal is to commission the east half of the Bioreactor in September to ensure the federal effluent regulations can be met by the end of December 2020. The Project can be seen using our web camera at www.transaqua.ca.

Programme de compostage 2020

Le programme de compostage de TransAqua continue de rencontrer un franc succès grâce à l'aide des habitants locaux, des municipalités et des œuvres de bienfaisance. Nous sommes ravis de proposer du compost dans le cadre de notre engagement auprès de la communauté pour un environnement plus durable.
