### **TransAqua appoints Jennifer Langille, CPA, CMA, CPC as Director of Finance and Administration**

**RIVERVIEW, N.B.** – TransAqua – the Greater Moncton Wastewater Commission – is pleased to announce the appointment of Jennifer Langille, CPA, CMA, CPC as its Director of Finance and Administration

Jennifer joins TransAqua with a diverse background in progressive accounting roles within many major private companies over a period of twenty years. This experience combined with innovative thinking and an ability to solve diverse challenges and problems will serve Jennifer well as TransAqua embarks on a \$90.4 million upgrade of its wastewater treatment facility between 2016 and 2021. Jennifer will play a vital role working with the Director of Technical Services and all staff to ensure that this major project is delivered on time and on budget.

“This appointment is a critical step in ongoing efforts to strengthen TransAqua’s accounting and financial oversight as we embark on this significant capital investment to allow us to meet the federally mandated regulations by 2020” said Kevin Rice, General Manager of TransAqua. “It is necessary to ensure that the ratepayers receive the best value for money not only for major capital projects but also for our daily operations”.

A native of Riverview, Jennifer is able to remain in the Greater Moncton area after having worked in Amherst and Saint John. Jennifer is a Certified Professional Accountant with ambitions to complete her Masters of Organizational Management at Crandall University.

### **About TransAqua**

TransAqua, the Greater Moncton Wastewater Commission ([www.transaqua.ca](http://www.transaqua.ca)) was established in 1983 to support the wastewater collection and treatment needs of the Dieppe, Moncton and Riverview tri-community. Since then, it has developed a 31-kilometre collection network and a treatment facility to best deliver on this mandate. It has also become a leader in the reuse of bio-solids

through the generation of type 'AA' compost (the highest grade currently achieved in Canada) as opposed to disposal in a landfill site. The organization is now positioning itself to further upgrade its facilities to provide an enhanced secondary treatment approach that will allow it to meet recently introduced mandatory federal regulations prior to the 2020 deadline.
